### **About Novita Healthcare Limited**

Novita Healthcare is a Melbourne-based medical technology company. Its flagship program is the revolutionary and innovative TALI system, which uses cutting edge technology to diagnose and treat cognitive problems such as attention difficulties in early childhood.

### **About the TALI system**

TALI Health Pty Ltd (100% owned by Novita Healthcare) has the exclusive global license to the TALI Technology together with the option to acquire the TALI Technology outright. TALI is seeking to position itself as the global leader in the diagnosis and treatment of attention difficulties, particularly in children with developmental disorders, such as autism. The TALI Technology is a result of ground-breaking research pioneered over twenty years by internationally renowned neuroscientist Professor Kim Cornish and her team at Monash University. The front end of the TALI Technology is an attention assessment and training program (accessed via a software application prescribed by healthcare professionals), delivered on a computerized tablet (or similar). The back end of the TALI Technology is a Cloud based, centralised secure data collection, analysis and report system.
